CHEMETAL TECHNICAL DATA

Below please find an abbreviated version of our technical data. More complete info is viewable and downloadable at chemetal.com.

USE:

Chemetal metal designs and laminates are recommended for interior use on vertical and light-duty horizontal surfaces. Please contact Chemetal if you are uncertain about the use of our Chemetal in any application. Caution should be taken on surfaces that may be exposed to harsh chemicals, acidic beverages (alcoholic, colas, etc.) without cleaning the surface for lengthy periods of time.

STORAGE:

Store flat, not on edge. The laminates should be stored face-up in a cool, dry area and in a completely supported flat position. Use a top sheet of chipboard or similar material to hold stored sheets flat. Protect material from twist, rack and edge damage.

HANDLING:

Many Chemetal designs are solid aluminum and may distort or kink if handled incorrectly. To prevent surface distortion, large sheets should be handled by two people and transported face up. Additionally, please view our "How to Handle Chemetal" video at chemetal.com under Downloads>Videos.

PROTECTIVE MASK:

Although Chemetal is supplied with a protective mask, care should be taken when handling. Exposure of masked sheets to light or heat for long periods of time may cause problems with the removal of the protective mask. It is recommended to leave this mask on the surface of the laminates during processing work. Additionally, masking tape. for extra protection in routing work, may be applied over the protective mask. Color uniformity and other quality checks should be carried out on the sheets beforehand by lifting up the edge of the mask and laying it back down.

CLEANING AND MAINTENANCE:

Clean with a soft cloth using mild soap and water or nonabrasive glass and metal cleaning liquids. Do not use ammonia, abrasive cleaners or pads, or harsh solvents.

SHIPPING:

Many Chemetal designs may be rolled for shipping. However magnetic laminates (150 Series and #160 and solid aluminum and metal sheets (including solid aluminum 100, 300, 400, 500, 600, 800 and 900 Series) cannot be rolled, even with low pressure laminate backer applied. One exception: 24" wide brass designs (800 Series) may be rolled with low pressure laminate backer. 300 Series brass and copper based sheets may be rolled - #310, #325, #337 and #338 must have low pressure laminate backer.

(Shipping cont.)

Chemetal recommends that all sheets of solid metal be shipped flat. The customer assumes all responsibility for sheets of solid metal that are rolled and shipped in a carton(s). When materials are rolled, care must be taken to avoid bending. Do not compress coils. Material with a backer must have the face out. Rolling with the face in will crack the backing material. Roll loosely to a minimum diameter of 18 inches. Chemetal cannot roll sheets of 48" wide metal that are backed with a low pressure laminate backer. 48" wide low pressure laminate backer backed Chemetal must be shipped flat.

All HPL backed Chemetal (200 and 700 Series) may be rolled and shipped in a carton. It is often cost effective to ship HPL backed Chemetal flat for orders greater than four sheets.

DIRECTIONAL ARROWS ON SHEETS:

Many Chemetal designs are marked on protective mask or label with directional arrows, indicating direction of finish. With multiple sheet installations, sheets must be installed with arrows pointing in same direction, otherwise sheets may reflect light differently and not match up.

CHEMETAL SUBSTRATE AND ADHESIVE CONDITIONING:

We recommend that all Chemetal materials, and the adhesives and substrates they are to be bonded to, remain in the same environment for a period of five to seven days for optimal pre-conditioning. A minimum of 48 hours is recommended for pre-conditioning. These times are recommended although decorative metal laminates have minimal dimensional change.

Chemetal should not be used in areas exposed to water, moisture, high humidity or high heat for prolonged periods of time. Do not use Chemetal in exterior installations.

RECOMMENDED SUBSTRATES:

Proper substrates must be used and careful bonding procedures observed. Substrates should be good quality plywood, high density particleboard, fiberboard or MDF. Do not use drywall, plaster, concrete or gypsum board.

Substrate should be a smooth surface free of debris, dirt and imperfections. Inconsistencies in substrate surface will project through and show in finished product.

If you have questions about using Chemetal, please contact us.

New Metal Tile Designs from Chemetal.

As part of our 2015 introduction, Chemetal has introduced 7 new metal tile designs. These designs offer the modern look of metal tiles in a grout free full sheet install. We patina these designs by hand and machine in our Easthampton, MA facility. Custom options are available, charges may apply. Contains recycled aluminum, may qualify for LEED.

Since these designs are larger in scale, they can't be accurately represented by smaller chip samples. Here, we've included closeup and full sheet images of the new designs. Samples are available in 8" x 10" sample size, please contact us to request the sample you want.

As seen in 4' x 8' sheet view, the pattern runs vertically on sheet. We are often promoting these sheets with pattern running horizontally, which we believe is the ideal orientation once installed. Because this design is created with a master plate, we cannot re-orient the pattern to run a different direction, except as a custom option.

These tile designs represent weathered tile designs and have natural imperfections in the surface and color variations that are an intended part of the design.

Chemetal #370-#376 Tech Info

Product Description: Solid Aluminum 4' x 8' sheets with embossed tile designs and aged appearance. Tiles represented on sheet are either 3" x 6" or 3" x 3", size is identified in product name. Ideal for vertical and light duty horizontal installation.

Product is offered as standard solid aluminum, low pressure laminate backer option. Because of the embossed design, laminate backer is affixed using contact adhesive.

Not for use in environments with direct heat, or in bathrooms or showers enclosures with direct water flow. For more complete technical info, please visit chemetal.com.

Size: 4' x 8' sheet

Weight: Approx. 10 LBS per sheet

Magnetic & Dry Erase Product Reference

Key Benefits:

- Feature a thin sheet of iron (ferrous, magnetic metal) in the HPL backer.
- Makes these more magnetic than "powdered" (ferrous powder sprinkled onto HPL backer) magnetic laminates.
- Easy to cut and fabricate like laminate.

HPL Magnetic Board

- Magnetic
- · Projection (with light paint)
- Paintable
- · Sheet Size: 4' x 8'
- Thickness: .04" (1mm)

Black Magnetic Chalkboard

- Magnetic
- Chalk
- · Sheet Size: 4' x 8'
- Thickness: .04" (1mm)

White Gloss Magnetic Dry Erase

- Magnetic
- Drv Erase
- Sheet Size: 4' x 8', 4' x 10'
- Thickness: .04" (1mm)

White Satin Magnetic

- Magnetic
- Projection
- Dry Erase (Limited, frequent cleaning required)
- · Sheet Size: 4' x 8'
- Thickness: .04" (1mm)

Lime Gloss Magnetic Dry Erase

- Magnetic
- Dry Erase
- · Sheet Size: 4' x 8'
- Thickness: .04" (1mm)

160

White Gloss Magnetic Dry Erase Steel

- Magnetic
- Dry Erase
- · Sheet Size: 4' x 8',
- 4' x 10', custom
- · Thickness: .023". .05" with backer
- · Metal fab. equip. for cutting

Custom Magnetic Laminate

We can apply any Chemetal 400, 500, 800 (metal only), 900 or Tints Series Solid Aluminum design to #150 Magnetic Board to create a custom magnetic laminate.

Sheet Size: 4' x 8' Thickness: .050"

1030

Marker Board, from InteriorArts.

- Non Magnetic
- Dry Erase
- Economically priced
- · Sheet Size: 4' x 8'
- Thickness: 03"

1031

- · Economically priced
- · Sheet Size: 4' x 8'

Product Info:

Chemetal Magnetic Laminates (#150-157) are high pressure laminates (HPL) that contain a thin iron layer sandwiched in the HPL Backer (look at sample edge to see) creating magnetic effect when used with magnets. Ideal for vertical interior application. Surface is melamine. 4' x 8' sheets, 4' x 10' in #152.

Tech Info:

Complete tech info is available for download at chemetal.com under "Downloads." We recommend obtaining and testing a sample prior to installation.

GraphMarker Board, from InteriorArts.

- · Non Magnetic
- Dry Erase

- · Thickness: 03"

Cleaning:

Once installed, sheets must be cleaned once mask is removed. We recommend either rubbing alcohol (found in most drug stores), hand sanitizer or dry erase board cleaner and paper towel. Sheets should also be regularly cleaned with this solution to prevent "ghosting."

#160 info:

Chemetal #160 is a steel dry erase magnetic material. It is value priced with excellent magnetic hold and a great "pure" white color. It requires metal fabrication equipment to cut. Chemetal can cut to size and apply laminate backer if requested (fee required).
